

A

Assumed constants against every admissible mycobacterial measurement

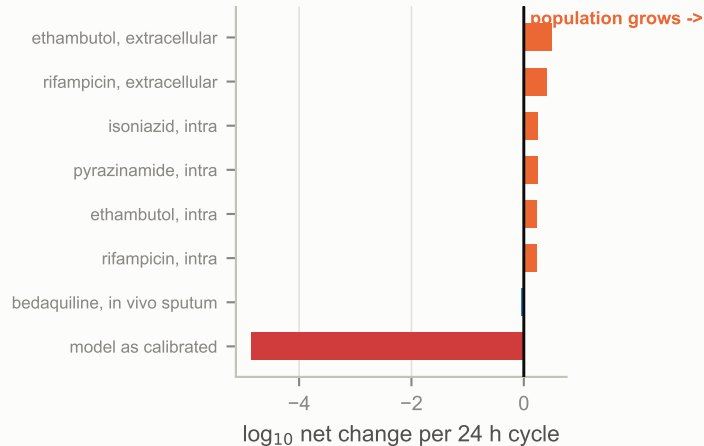

B The shape ratio is not a constant

Intracellular measurements only. Blue and green are two independent laboratories. Within the second alone the ratio runs 0.65 to 4.10 and halves between windows.

C At infinite drug, the cycle still fails

A 5 h pulse then 19 h regrowth. 6 of the seven published parameter sets leave the population growing at unlimited drug. Six of those come from one publication.
